

## L370 COMMON EMITTER PNP AMPLIFIER WITH A LED AND BULB

1x LED

1x switch

1x resistor 1kΩ

1x battery

1x

3x

1x

1x bulb

1x transistor PNP

1x potentiometer

Functionally, it is the same circuit as the NPN amplifier with LED, just with a transistor of opposite conductivity. The base current flows in the opposite direction; therefore, it is necessary to modify the base circuit accordingly.
