

G30 PING PONG MULTIPLAYER

In the previous project, you learned how to build a game console using Boffin Magnetic. Now it is time to play a game against a friend. First, adjust the position of the changeover switches as shown in Figure 2. This will take you to a game called Ping Pong. This game is meant for two players. One of the players uses two buttons and the other one a joystick. To keep the game fair, we recommend swapping the controls after each game.
